EDUCATION

Bachelor of Science in Computer Science and Engineering

April 2018 - June 2023

Ahsanullah University of Science and Technology, Dhaka, Bangladesh

EXPERIENCE

Computer Vision Research Assistant, New York University (Remote) (Volunteer)

June 2026 – Present

Advisor: *Professor Zhengyuan Zhou*

- Benchmarked five VLM/OCR models on a medical report image dataset and developed an evaluation framework.
- Built an end-to-end OCR pipeline (Python, Flask, Gemini 3.1 Flash-Lite) to extract structured health metrics from medical reports across image, PDF, and DOCX formats.
- Integrated the pipeline into the **NutriCam** iOS application with backend API integration, enabling users to review, edit, and persist extracted results to MongoDB.

Natural Language & AI research Lab – Researcher (Remote)

Oct 2025 – June 2026

- Developed BaSCo, a benchmark to evaluate LLMs across social bias & cultural commonsense.
- Evaluated LLMs on zero-shot poetry summarization using automatic metrics.

eComFixR – Junior Web Developer (On-site)

Aug 2025 – Oct 2025

- Developed and customized responsive Shopify & WordPress websites and plugins. Worked with PHP, HTML5, CSS3, JavaScript, jQuery, Git, and WooCommerce.

PUBLICATION

- “**BaSCo: A Benchmark for Evaluating Social Bias and Cultural Commonsense in Bangla LLMs**”
Afsara Tasnim, Md. Shamsur Rahman, Ajwad Abrar
Accepted at MusIML Workshop, ICML 2026
- “**Assessing Large Language Models on Zero-Shot Poetry Summarization Using ROUGE, BERT, and LLM-as-a-Judge Metrics**”
Md. Ismiel Hossen Abir, Nayeema Ferdous, **Afsara Tasnim**, Nabiha Mustaqeem
5th International Conference on Electrical, Computer & Telecommunication Engineering (ICECTE), 2026
- “**Explainable Contrastive and Cost-Sensitive Learning for Cervical Cancer Classification**”
Ashfiquin Mustari, Rushmia Ahmed, **Afsara Tasnim**, Jakia Sultana Juthi, G. M. Shahariar
26th International Conference on Computer and Information Technology (ICCIT), 2023

PROJECTS

- Melodia** – (ReactJs, Tailwind CSS, Javascript, NodeJs, MongoDB, Stripe API) | [Live Site](#) | [Github](#) 05/2023
 - Built a single-page online education platform with Stripe payments, allowing students to enroll in classes and instructors to manage courses and bookings. Includes private routes, CRUD operations, and admin panel for feedback management.
- Thyroid Cancer Detection**– (Deep Learning, Explainable AI) 2022
 - Developed an automatic cancer detection system and performed multi-class image classification by fine-tuning ResNet50 and VGG16, achieving 82.73% and 79.14% accuracy respectively. And integrated LIME XAI for transparency.

SKILLS

Programming Languages

LLM & NLP Tools

Front-End & Back-End

Databases

Frameworks & Libraries

Java, Python, C++/C, JavaScript

Hugging Face Transformers, OpenRouter, Tokenizers, Prompt Engineering

NextJs, ReactJs, REST APIs, Tailwind CSS, HTML5, CSS3, ExpressJs, NodeJs

No-SQL: MongoDB, Firebase; **SQL:** MySQL, MSSQL

PyTorch, TensorFlow, NumPy, Pandas, Keras, Scikit-learn, NumPy, Matplotlib
