

EDUCATION

Bachelor of Science in Computer Science and Engineering

April 2018 - June 2023

Ahsanullah University of Science and Technology, Dhaka, Bangladesh

EXPERIENCE

Computer Vision Research Assistant, New York University (Remote)

June 2026 – Present

- Benchmarked five VLM/OCR models, developed an evaluation framework, and built a Python/Flask pipeline to extract structured health metrics from images, PDFs, and DOCX files; integrated the pipeline into **NutriCam**'s iOS app with backend API integration, enabling users to review, edit, and persist extracted results to MongoDB.
- Developed & evaluated a context-aware LLM-VLM framework with FNDDS-grounded retrieval-augmented generation (RAG) for estimating ingredients, food quantities, and nutritional values from 2D food images.

eComFixR – Junior Web Developer (On-site)

Aug 2025 – Oct 2025

- Developed and customized responsive Shopify & WordPress websites and plugins. Worked with PHP, HTML5, CSS3, JavaScript, jQuery, Git, and WooCommerce.

PUBLICATION

- “**BaSCo: A Benchmark for Evaluating Social Bias and Cultural Commonsense in Bangla LLMs**”
Afsara Tasnim, Md. Shamsur Rahman, Ajwad Abrar, Published at MusIML Workshop, ICML 2026
- “**Assessing Large Language Models on Zero-Shot Poetry Summarization Using ROUGE, BERT, and LLM-as-a-Judge Metrics**”
Md. Ismiel Hossen Abir, Nayeema Ferdous, **Afsara Tasnim**, Nabiha Mustaqeem
5th International Conference on Electrical, Computer & Telecommunication Engineering (ICECTE), 2026
- “**Explainable Contrastive and Cost-Sensitive Learning for Cervical Cancer Classification**”
Ashfiquin Mustari, Rushmia Ahmed, **Afsara Tasnim**, Jakia Sultana Juthi, G. M. Shahariar
26th International Conference on Computer and Information Technology (ICCIT), 2023

PROJECTS

- Melodia** – (ReactJs, Tailwind CSS, Javascript, NodeJs, MongoDB, Stripe API) | [Live Site](#) | [Github](#) 05/2023
 - Built a single-page online education platform with Stripe payments, allowing students to enroll in classes and instructors to manage courses and bookings. Includes private routes, CRUD operations, and admin panel for feedback management.
- Thyroid Cancer Detection**– (Deep Learning, Explainable AI) 2022
 - Developed an automatic cancer detection system and performed multi-class image classification by fine-tuning ResNet50 and VGG16, achieving 82.73% and 79.14% accuracy respectively. And integrated LIME XAI for transparency.

COMPETITIVE PROGRAMMING

- Leetcode: 270+ problems solved | participated in 3 contests (top 22%) | [Link](#)
- CodeChef: 1400+ Highest Rating | (2 star) | [Link](#)
- Solved 500+ Questions on Coding Platforms like LeetCode, CodeForces, CodeChef, and GeeksforGeeks.

SKILLS

Programming Languages
LLM & NLP Tools
Front-End & Back-End
Databases
Frameworks & Libraries

Java, Python, C++/C, JavaScript
Hugging Face Transformers, OpenRouter, Tokenizers, Prompt Engineering
NextJs, ReactJs, REST APIs, Tailwind CSS, HTML5, CSS3, ExpressJs, NodeJs
No-SQL: MongoDB, Firebase; **SQL**: MySQL, MSSQL
PyTorch, TensorFlow, NumPy, Pandas, Keras, Scikit-learn, NumPy, Matplotlib
